Profile summary

- **Aldar:** owned requirements and delivery across Aldar communities; created a reusable smart city blueprint.
- **Disrupt-X:** promoted to Product Manager in 6 months; turned customer feedback into IoT platform requirements.
- **Terminus:** vendor side of the same Aldar smart city work; contributed to AIoT solution definition, proposals and POC framing.
- **Samsung Electro-Mechanics:** promoted to Manager; coordinated testing and root cause analysis; received three awards.

Education and certifications

- MBA with Distinction, Philippine Christian University (2025)
- BS Electronics Engineering, University of Batangas (2020)
- Registered Electronics Engineer; Certified Scrum Product Owner

Former employers and experience

- Aldar, then technology vendor Terminus Group: Smart City Lead & Product Owner (2024 to 2026)
- Disrupt-X: Product Manager (2023 to 2024)
- Samsung: Product Development Manager (2020 to 2023)
- Independent consulting (freelance, not full time): Senior Consultant, AI & Digital Products, northmark, Oct 2026 to present

Experience working in UAE and KSA

- Aldar, Abu Dhabi: smart city, Nexus and parking work
- Terminus: Miral and Dubai Municipality opportunities
- Disrupt-X: IoT platform across UAE, Saudi Arabia and Oman

Selected projects

Aldar Smart City Blueprint
ALDAR · DELIVERED

Created a reusable framework for use cases, requirements, vendor evaluation, scoring and impact; applied across existing and new community deployments.

Project Nexus Command & Control Centre
ALDAR · DELIVERED

Reviewed technical site surveys for 80+ assets (building management, security, access control, CCTV, fire); prepared summaries for consultant requirements.

Saadiyat and Mamsha smart parking
ALDAR · ASSESSED

Assessed and coordinated a proposed unified parking integration across both districts (assessment stage).

Disrupt-X Enterprise IoT platform
DISRUPT-X · DELIVERED

Managed roadmap and backlog across environmental, fleet, smart parking and energy capabilities; turned operator feedback into requirements.

Miral Smart Destination
TERMINUS · POC FRAMING

Supported requirements and solution definition across smart destination use cases; helped prioritise the most feasible ideas and framed the POC validation path and success criteria.

Dubai Municipality wastewater
TERMINUS · PROPOSED

Led requirements and solution framing for municipal infrastructure visibility and intelligent operations.

Disrupt-X connected platform delivery
DISRUPT-X · DELIVERED

Managed engineering, QA, partners and customers through integration, testing and UAT across sensors, gateways, LoRaWAN, NB-IoT, APIs and dashboards.

SELECTED BUSINESS IMPACT

~ marks approximate estimates, delivered with cross functional teams and vendors

~40% faster infrastructure failure response — ALDAR	**~30%** improvement in monitoring efficiency — ALDAR	**~25%** reduction in energy costs — ALDAR	**~15%** growth in platform adoption — DISRUPT-X	**AED 30M+** digital platforms portfolio exposure — ALDAR	**95%+** reported UAT success rate — DISRUPT-X

Delivered, assessed, proposed and POC work is labelled as such. Full details in the CV and at markgomez.vercel.app
